

# Cookies policy

## What are cookies?

The FABRYO website is using tracking cookies. Cookies are text files stored in a computer through an Internet Browser. Many websites and servers use cookies. Many cookie modules contain a so-called cookie code. A cookie ID is a unique tracker of the cookie. It is comprised of a string of characters by which the webpages and the internet servers may be attributed to the Internet browser in which the cookie was stored. This enables the visited websites and servers to differentiate individual browser of the data from the data of other Internet browser which contain other cookies. A certain internet browser may be recognized and identified by using a unique cookie code.

## What are cookies used for?

By using Cookies, FABRYO is able to provide its users services that are easier to use, which services would not exist without the Cookies setting. With the help of cookies, the information and the offers on our website may be optimized for each user. Cookies allow us to recognize the users of our website. The purpose of this recognition is to make it easier for the visitors to use our website. The visitor of a website that uses cookies modules does not have to enter their access data each time they log on because such data is taken over by our website and the cookie is thus stored in the user's computer system.

## What cookies do we use?

The FABRYO websites use two types of Cookies:

**Session cookies** - are temporary files which are stored on the user's terminal until the relevant is completed or until the application (web browser) is closed.

**Permanent cookies** - they are stored on the user's terminal for a certain period within the Cookies parameters or until they are manually erased by the user.

The cookies used by the partners of a web page operator, including without limitation the users of that web page, are subject to the applicable Confidentiality Policy.

## What type of personal data do cookies access?

The personal data accessed through Cookies are collected only to facilitate certain functionalities for the user. These data are encrypted in a way that make them impossible to access by unauthorized personnel. A cookie comprises information that links a web browser (the user) to a specific web server (the website). If a browser accesses that web server again, the web server can read the information that was already stored and may act accordingly.

Cookies ensure the visitors of the FABRYO websites a pleasant web surfing experience and support the efforts of many websites of offering comfortable services to their users: e.g.– preferences regarding online confidentiality, options regarding the language displayed on the website, shopping carts, etc.

## **Reject Cookies**

All modern browsers allow you to change the cookies settings. These settings can be found in general under the “options” tab or in the “preferences” menu of your browser.

As visitors of the FABRYO websites, if you do not wish to benefit from the facilities offered by the Cookies, there are several ways in which you may reject them:

- Use the cookies block tools in the settings of any browser
- Use the ”I DO NOT ACCEPT” tab on the menu bar in which we mention the existence of the Cookies technology with respect to our webpages

For the cookies settings generated by third parties and for more information on the confidentiality relating to online advertising, IAB Romania is providing the following link:
